

AirSense®

TRUSTED INSIGHTS FOR SMARTER DECISIONS

Aviation stakeholders are constraint to base their operational decisions on incomplete air traffic information.

Airlines, Airports and ANSPs can benefit from global real-time situational awareness to take better decisions for an overall optimized system.

AirSense is the result of an Airbus lead study to provide Global Enhanced Data and Analytics.

Our Vision

Make more of the sky.

Our Mission

Provide real-time analytics to enable better decisions by Aviation Stakeholders.

Your Benefits

Increased situational awareness

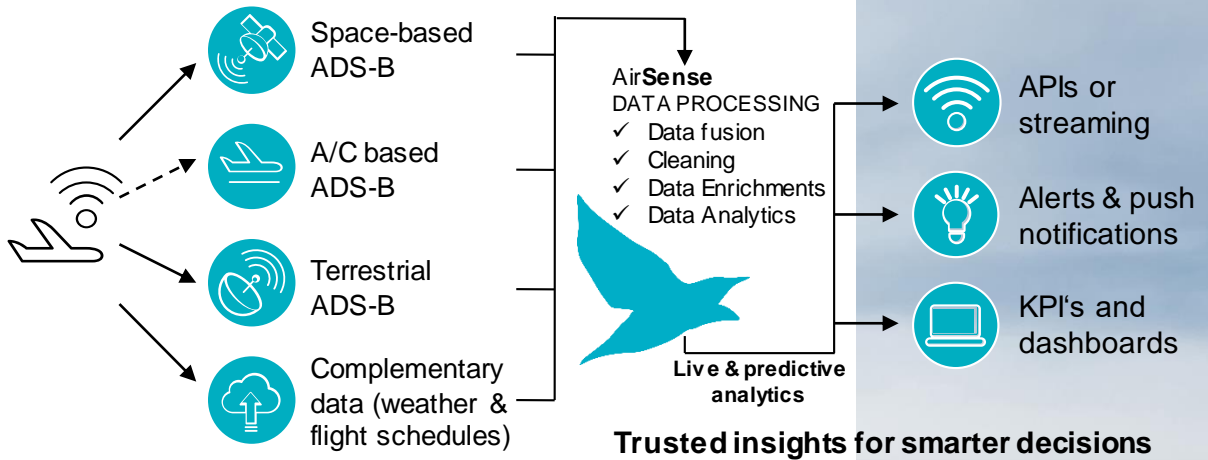

Safer and greener skies

Higher operational savings

AIRBUS

AirSenseValue

ServicePortfolio

FLIGHT SUMMARIES

Key information pertaining to the Flight tracking, once the flight has landed. Easy to access and designed for analytics and business intelligence applications.

OPERATIONAL REPORTING DASHBOARDS

Highly interactive dashboard solutions to visualize operationally relevant KPIs and generate automated reports on those.

LIVE EVENT NOTIFICATIONS

Live notifications about customizable Event detections

AIRCRAFT AND SYSTEM LIVE STATUS

Real-time detection of status with flexible filters, triggers and thresholds. (i.e.: aircraft in TMA / on ground at CDG)

PREDICTED TIME OF ARRIVAL

Customizable predictions about aircraft arrival to Geo-Location (i.e.: TMA) or Runway.

AIRPORT MAP VISUALIZATION

Visualization of live flight movements and event detections (as well as replay historic data). View focused on Airport and Airspace of the Area of Operation.
